

Asset Management Program

A 2-week 'evenings and weekend' interactive online course
for professionals looking to make a career move into buy-side equity research or
early-career analysts looking to accelerate their contribution to the firm

Denny Ellison
Analyst Training Program

Course Overview

Summary

This 2-week 'evenings and weekend' intensive course covers the key skills needed to start a new career as an equity research analyst at an asset management firm. It includes five 2-hour modules. The first module focuses on the interview process for this role. The following two modules cover the technical knowledge needed to be 'desk ready' and accelerate your early contribution to the team. And the last two modules focus on how to build a strong investment case and write a clear, well-structured, and compelling research report.

We combine theoretical learning with practical exercises. In class, you will practise interview skills through a mock interview, build a company model from scratch, present a stock pitch, and write sections of a report. The training material includes slide presentations, a best-practice handbook, Excel and Word templates, and exercise handouts.

Who is it for?

This course will benefit professionals looking to make a career move into asset management as an equity research analyst.

The course will suit professionals who have worked as the following: chartered accountant, sell-side equity research analyst or sales person, investment banking analyst, private equity professional, wealth management advisor or consultant.

Certificate and CPD endorsement

Each participant will receive a total of 10 hours' worth of CPD endorsement by the CISI for the whole program.

Participants will also receive our certification for the courses taken.

Expected results

By the end of the course, you should have a better understanding of:

- What employers look for in a research analyst
- How to build a company model
- How to value a company
- How to calculate relevant operating ratios
- How to construct a solid investment case
- How to produce impactful and well-written research reports

2023 course dates

- 20 to 30 March 2023
- 10 to 20 July 2023
- 6 to 16 November 2023

Please refer to the 'Booking' page for more information on dates and times.

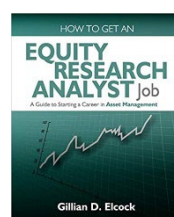

Course format

The courses will be delivered over Zoom either in the evening (4:30 – 6:30pm) during weekdays or on a Saturday (10am to 2pm) UK time, unless indicated otherwise.

Our typical class size is around 10 participants.

Pre-course work

If you are looking to make a career move into buy-side equity research, we highly recommend that you read the following book prior to taking this course:

'How to Get an Equity Research Analyst Job: A Guide to Starting a Career in Asset Management'
by Gillian D. Elcock

Denny Ellison

Why choose Denny Ellison?

Our courses are designed specifically for people wanting to work as research analysts.

Each class is delivered by experienced equity research analysts who have been trained and are qualified in teaching techniques.

A Leading Specialised Training Provider

We have trained analysts at leading global and UK asset management firms.

[View Client Testimonials](#)

We cover both soft skills and technical skills. Soft skills include interview, communication and presentation skills. Technical skills include financial analysis, modelling and valuation, as well as stock picking and writing skills.

Our live online classes allow for a high level of interaction.

Analysts have the chance to engage in real-life exercises, such as presenting an investment thesis or participating in role plays.

Our approach to teaching is practical and example-led, rather than academic.

We have conducted research with key players in the industry, including buy-side analysts, portfolio managers and experienced analysts.

Our proprietary survey of early-career analysts enabled us to identify their main challenges.

We have examined the MiFID II regulations and their likely impact on the roles of buy-side and sell-side research analysts.
